Lamar Light & Power will begin Manual Electrical Meter Reading.

Beginning Jan 3rd 2022, Lamar Light & Power will begin to manually collect monthly readings of their Electrical meters. This will include but not limited to all Electrical meters in our service area that do not meet our Sensus FlexNet Advanced Automated Metering Infrastructure criteria.

We would ask our customers to please make sure we have access to your meters, which could be located in your back yards, in/or on porches, or service poles in your yards. As well as to make sure your pets are not located next to, or attached to the location of our Electrical meters.

Lamar Light and Power will continually strive to provide reliable power at competitive rates to all consumers and businesses we serve throughout Prowers and Bent Counties. We will provide professional service through a commitment to excellence and work to maintain Lamar and the surrounding area as vital progressive communities.

If you have any questions please contact Jason Gass @ Lamar Light and Power, Electric Shop Supervisor.
